

TRU FACE® PEPTIDE RETINOL COMPLEX

MEET AGELOC TRU FACE PEPTIDE RETINOL COMPLEX

Craving a fresh-faced you? Say hello to effortlessly radiant skin, care of ageLOC Tru Face Peptide Retinol Complex. Formulated with AI-enhanced, clinically proven peptide technology, this powerful multitasker delivers rapid results in an oh-so-gentle formula. It works with your skin's natural renewal processes to help visibly reverse signs of skin damage. We're talking visibly reduced pores and hyperpigmentation, as well as noticeably improved skin tone and texture and reduced appearance of fine lines and wrinkles. It's powerful potency—without the punch.

The secret lies in the formula, powered by a unique, nature-identical peptide technology that multiplies the benefits of retinol, helping visibly reduce fine lines, wrinkles, and pores and improve skin tone, elasticity, and smoothness. But that's not all. Our potent retinol complex contains two types of retinoids—retinol and a retinoic ester—for results that are super impressive, but not aggressive. Plus, our proprietary ageLOC Blend targets the sources of aging to maintain a youthful, vibrant appearance. All while an ultra-gentle Jojoba + 4TB combo helps soothe and hydrate skin. Reveal a fresh-faced you with ageLOC Tru Face Peptide Retinol Complex.

WHY YOU'LL LOVE IT

- Formulated with an advanced peptide technology that supports smoother, younger, bouncier-looking skin and is shown to improve the benefits of retinol.
- Formulated with clinically tested anti-aging peptide discovered by AI. This nature-identical peptide targets aging skin concerns.
- Provides powerful results while being gentle on skin.
- Contains soothing ingredients to help calm and hydrate skin to reduce potential skin dryness and flakiness.

- Delivers dramatic results without the drying, flakiness, or redness common with most retinols.
- Visibly improves skin appearance and multiple signs of aging in as little as one week.
- Works with skin's natural renewal process to help visibly reverse signs of skin damage.
- Reduces the appearance of skin discoloration, hyperpigmentation, and dark spots.
- Reduces pore appearance.
- Helps visibly brighten skin and even skin tone.
- Helps improve skin texture, reduce roughness, and deliver a smoother look and feel.
- Helps preserve skin's natural moisture barrier.
- Reduces the appearance of fine lines and wrinkles.
- Formulated with our ageLOC Blend to target the sources of aging and maintain a youthful, vibrant appearance.
- Formulated fragrance-free and gentle enough for daily use.
- Safety-dermatologist tested.

HOW TO USE IT

Apply to healthy skin on face and neck each night after cleansing. Follow with your favorite Nu Skin® moisturizer. Avoid contact with eyes. Rinse thoroughly if contact occurs.

WHAT POWERS IT

- **Advanced Peptide Technology**—first clinically tested, nature-identical anti-aging peptide discovered by AI that targets key signs of aging while boosting retinol benefits.
- **Potent Retinol Complex**—blend of stabilized pure retinol and retinoic acid ester (HPR) helps promote cell turnover to improve the appearance of lines and wrinkles, skin tone, texture, and elasticity—without the harsh side effects.
- **Jojoba + 4TB Blend**—a gentle blend that helps soothe and hydrate for calming skin relief.

ageLOC® TRU FACE® PEPTIDE RETINOL COMPLEX

- **ageLOC Blend**—targets the sources of aging to help maintain a youthful, vibrant appearance.

CLINICALS THAT PROVE IT

Nu Skin conducted an 8-week in-house study where 31 male and female participants, ages 35–70, used ageLOC Tru Face Peptide Retinol Complex once nightly.

AFTER JUST ONE WEEK:

- 87% participants agreed their skin looks/feels more energized and healthier.
- 80% participants agreed their complexion looks brighter.
- 80% participants agreed their pores look tighter.
- 83% participants agreed their skin looks and feels rejuvenated.
- 80% participants agreed their skin feels comfortable and balanced.

Plus, results improved over time. After 8 weeks:

- 97% participants agreed pores look tighter.
- 93% participants agreed their complexion is brighter.
- 97% participants agreed the product is youth-promoting.
- 97% participants agreed their skin looks luminous and clear.
- 100% participants agreed their wrinkles look filled in/less visible.
- 100% participants agreed their skin has more youthful bounce and plumpness.
- 100% participants agreed their blemishes are less visible.

In addition, participants experienced measurable improvements* in the following visible traits:

- 64% improvement in elasticity
- 38% improvement in skin barrier
- 20% improvement in firmness after just one use

*Bioinstrumentation measurement data

Nu Skin also commissioned a clinical study where 10 male and female subjects between the ages of 30 and 65 were recruited. Participants used ageLOC Tru Face Peptide Retinol Complex nightly on clean facial skin. ageLOC Tru Face Essence Ultra was used twice daily and applied after the Peptide Retinol Complex at night. Expert grading was conducted, and images were taken.

After only two weeks, the expert grader noted the following:

- 70% of subjects showed reduction in fine lines/wrinkles
- 60% of subjects showed reduction in appearance of pores
- 60% of subjects showed reduction in undereye puffiness
- 50% of subjects showed improvement in radiance/luminosity

After 12 weeks, the expert grader noted the following:

- 90% of subjects showed reduction in fine lines/wrinkles
- 90% of subjects showed reduction in appearance of pores
- 100% of subjects showed improvement in skin texture
- 70% of subjects showed reduction in crow's feet
- 90% of subjects showed improvement in skin contour/firmness/lifted appearance

LEARN MORE ABOUT IT

What makes ageLOC Tru Face Peptide Retinol Complex so unique?

Unlike many other retinol products on the market, Peptide Retinol Complex is gentle—and can even be suitable for those with sensitive skin. It provides all the benefits that you'd want from a retinol product—and more—without the harsh side effects, like dryness, redness, flakiness, and skin irritation. It is also formulated with the first AI-discovered, nature-identical peptide that's clinically proven to target aging skin concerns, which helps boost the effects of retinol. And finally, Peptide Retinol Complex contains two types of retinoids—stabilized pure retinol and retinoic acid ester—to help deliver maximum benefits. It also contains our proprietary ageLOC Blend, which targets the sources of aging to help maintain a youthful, vibrant appearance.

What is the Advanced Peptide Technology in ageLOC Tru Face Peptide Retinol Complex?

As humans, we are inherently limited in the amount of time we can spend researching ingredients. But using AI, we can identify the ideal ingredients to help maximize the benefits of our products quickly—and more effectively. Our Advanced Peptide Technology was the first clinically tested, nature-identical anti-aging peptide to be discovered using AI. This peptide works synergistically with retinol to boost its effectiveness. It's also fast-acting and targets the key signs of aging, including visibly reducing pores and hyperpigmentation, as well as improving skin tone and texture and reducing the appearance of fine lines and wrinkles.

What does the Jojoba + 4TB Blend do for my skin?

The Jojoba Esters and 4TB (a soothing molecule) help to soothe and hydrate skin so that you can enjoy great retinol benefits without the aggressive side effects.

ageLOC® TRU FACE® PEPTIDE RETINOL COMPLEX

What's important about the types of retinoids used in ageLOC Tru Face Peptide Retinol Complex?

There are four main types of retinoids: retinoic acid, retinaldehyde (sometimes referred to as retinal), retinol, and retinyl esters. They vary in potency and strength, with retinoic acid being the most potent and retinyl esters being the least. Retinoic Acid is the most potent because it is the most active form of vitamin A, but it is irritating for most skin types and is not available for use in many markets. Peptide Retinol Complex is formulated with retinoic acid ester, a next-gen version of retinoic acid that doesn't irritate the skin. Peptide Retinol Complex also contains stabilized pure retinol for maximum benefits with the least amount of irritation.

When should I use ageLOC Tru Face Peptide Retinol Complex?

You should use ageLOC Tru Face Peptide Retinol Complex once per day, in your night skincare routine. Because you may experience increased sun sensitivity—especially during the first few weeks of use—we recommend limiting your sun exposure. Also, make sure to wear sunscreen daily, especially when using any retinol product.

Can people with sensitive skin use ageLOC Tru Face Peptide Retinol Complex?

ageLOC Tru Face Peptide Retinol Complex was specially formulated to be gentle and soothing to skin, so even people with sensitive skin can experience the benefits. However, individuals can be sensitive to any new skincare product, so do a spot check and/or check with your dermatologist if you have sensitive skin.

How does ageLOC Tru Face Peptide Retinol Complex support Nu Skin's commitment to become more sustainable?

As responsible stewards of our planet, we have proudly designed the ageLOC Tru Face Peptide Retinol Complex bottle with 25% recycled material. Please check your local capabilities and recycle all bottles, cartons, and jars where possible. By purchasing ageLOC Tru Face Peptide Retinol Complex, you're joining us in taking an active, engaged stride to ensure the future is bright for both the planet and each of us. Visit nuskin.com/sustainability for more information and details on how to recycle.
